

SNAKE THING

BY ARTIST TOM RUSH

These are the colours you'll need to make this monster, I only used my fingers to shape the plasticine, so there are no tools needed!

Roll a long tentacle shape with a flattened end and coil it around like a snake resting. Next make a rough cube shape and place it on the end of your tentacle shape, this will form the head!

Firstly you must make some dents for the eyes to sit in, using your fingers firmly press some little recesses and roll some orange balls to place within them.

After that you can make some small purple disks to flatten on the surface of the eyes to act as pupils. Now make some small lengths of green plasticine to act as eyelids!

Gently place the eyelids over the top of each eye. Once you have done this you can roll some small cone shapes to use as teeth! I have chosen yellow for this, but really they can be any colour. Gently press the teeth in place and cover their bases with a small overlap of green plasticine.
